CAREER OBJECTIVE

Motivated Full Stack Developer who builds scalable SaaS applications, modern web platforms and user-focused digital products. Skilled in Laravel, PHP, Next.js, TypeScript and modern web technologies, with hands-on experience adding AI-assisted reporting and compliance features to a live vendor-management platform at Vetted Work, and building Pixora, a drag-and-drop website builder and CRM platform. Seeking opportunities to contribute technical skills, problem-solving abilities and a continuous learning mindset in a growth-oriented software development environment.

PROFESSIONAL EXPERIENCE

Vetted Work, *Laravel Developer* 2026 – Present

Vendor-Management & Safety-Compliance SaaS (Laravel, PHP, MySQL, MongoDB)

- Built a super-admin **Reports module**: missing-insurance (COI) and missing-default-project reports with search, filters, sorting, pagination, charts and Excel export.
- Designed **"Ask AI"**, a natural-language assistant that answers vendor, permit, training and insurance questions from live data using an LLM (Anthropic Claude API). It sees only totals, never vendor names or personal data.
- Made AI-written queries safe: whitelisted tables and columns, a validator that allows a single SELECT only, read-only transactions, row and time limits, and an audit log with user feedback.
- Added spelling-tolerant client, region and vendor name matching, a live data-dictionary page, and a regression suite of real questions checked against plain SQL, plus PHPUnit tests.

Key features and fixes

- **Permit signature authority matrix**: added role-conflict checks so one person cannot hold two conflicting permit roles (requester, approver, person in charge, area owner, person doing the work); wrote and ran a manual test plan for each role combination.
- **Bypass AI permission**: new permission and button so authorised users can skip the AI check on a permit.
- **Vendor access lock-out**: built super-admin site-visit overrides with a highlighted "GOD MODE" control and a lock-out badge shown only to the right client's users.
- **Australian English for an Australian client**: made permit and form text locale-aware, so only that client's users see Australian spellings.
- **Permit form pop-up bug**: fixed info icons that would not open when placed inside a label.
- **Vendor export**: named files with date and time using clean hyphenated names.

Kynaite Software, *Laravel Developer* 06/2025 – 10/2025 | Nepal

- **Multi-Restaurant App (Laravel, Blade, MySQL):** built authentication, CRUD and role-based access with open-source packages (no paid services), modular Blade views, and email notifications for order status.
- **Tarahara Utsab website:** built a full-stack website for an event-organisation platform.
- **Newspaper website (WordPress):** customised themes and managed plugins.

ACHIEVEMENT

Project Exhibitor at IIC | ING Higher Education Expo, 27/02/2026
Itahari International College

Project Exhibitor at IIC Quest 3.0, *Itahari International College* 12/06/2025

PROJECTS

Pixora ↗
Pixora — Drag-and-Drop Website Builder & CRM Platform
Tech Stack: Next.js, TypeScript, Tailwind CSS, Prisma ORM, MySQL, Clerk Auth, Stripe Connect, Vercel

- Built a full-stack SaaS website builder platform with drag-and-drop visual editing and real-time preview.
- Developed one-click website deployment with automated subdomain provisioning.
- Implemented CRM Kanban pipeline management and team collaboration features.
- Integrated Stripe Connect for subscription billing and payment workflows.
- Designed responsive reusable UI components using Tailwind CSS and App Router architecture.
- Added AI chatbot integration, media management, authentication and role-based access control.
- Applied Agile Scrum methodology with unit testing, API testing and deployment workflows.

Sagarmatha AI ↗
AI-powered Next.js platform that generates runnable coding projects using Inngest agents, E2B sandboxes, tRPC and Prisma.
Tech Stack: Next.js 15, TypeScript, tRPC v11, TanStack Query, Prisma, PostgreSQL, Inngest, E2B, Clerk.

Airwings-Horizon ↗
The Flight Booking System lets customers book flights and admins manage flights and bookings via a dashboard.
Tech Stack: React.js, Tailwind CSS, Django

बुक गरौं सल्लाह ↗
This system offers a user-friendly digital interface where patients can conveniently book appointments online, and administrators can manage the entire process through a centralized dashboard.
Tech Stack: Java, Servlets, JSP, HTML, CSS, JavaScript

LetsWatchTogether ↗
A Chrome extension that bypasses the “Your device isn’t part of the Netflix Household” restriction, allowing continued access to Netflix content from any location.
Tech Stack: HTML, CSS, JavaScript

SKILLS

Technical Skills
Frontend Development: React, Blade, JavaScript, Tailwind CSS, JSP
Backend Development: Laravel (PHP), Django, Java (Servlets), Next.js
AI & Data: LLM integration (Anthropic Claude API), prompt design, safe natural-language-to-SQL
Databases: MySQL, PostgreSQL, MongoDB
Tools & Platforms: VS Code, Git, GitHub, Postman, PHPUnit, ClickUp, Netlify

Soft Skills
Communication Skills
Problem Solving
Teamwork
Self Learning and Curiosity

EDUCATION

BSc. (Hons) Computing 10/2023 – present
Itahari International College ↗
London Metropolitan University ↗
Sundarharaicha – 4, Morang, Nepal

Higher Secondary +2 Science 07/2021 – 07/2023
Koshi Saint James Secondary College
Itahari 6, Sunsari

CERTIFICATES

React.js: Building an Interface ↗ | React Essential Training ↗ | Oracle Java Foundations ↗
